Description

[Edit](#)

This test will verify that winning and losing are correctly recorded

Steps:

- start the app with npm start
- access the app at <http://localhost:8000>
- click on the "Draw" button
- add two bot cards to player-duo, randomly pick one bot card, click on the "Add to Duo" button, make sure that bot card goes to the player-duo area. Repeat the process again, randomly pick a bot card, click on the "Add to Duo" button, make sure that bot card goes to the player-duo area
- click on the "DUEL!" button,
- wait for few secs, the page will display if you win or loss, make sure the wins increments if you win, otherwise the losses should increments if you loss
- repeat above process few times, make sure you at least win once and loss once, and for both winning and losing, those are correctly reflect at the Wins and Losses area.

Test Post-conditions:

- If you win the number next to Wins should increment by one
- if you lose the number next to Losses should increment by one
