Overview:

Test the functionality of the duel duo application

Links:

http://localhost:8000

Github link: G GitHub - awlFCCamp/assessment-qa-devops

Test-Criteria:

- clicking on the "See All Bots" will see all bots 's card.
- clicking on the draw button will produce a choices div with 5 bot cards
- on each bot card, user can click on the "Add to Duo" button
- after clicking on the one of the "Add to Duo" button, a player-duo div element will appear
- after previous step, confirm that the bot-card inside the player-duo div has a "Remove From Duo" button
- continue from previous step, click on the "Remove From Duo" button
- After clicking the "Remove From Duo" button, verify than the bot-card go back to the choices div, choices div now has 5 bot card again.
- Test game playing logic, after adding 2 bot cards to the player-duo, adding third bot card to player-duo will trigger error
- After adding 2 bot cards in the player-duo, the "DUEL!" button is clickable and produces result
- Winning and losing result is correctly reflecting on the page Wins and losses section
- "Play again" button is clickable, and take user back to the Draw page
- repeating previous step, clicking on "Draw", clicking on "Add to Duo" clicking on "Duel!", make sure both winning and losing happens once and both of them are correctly reflecting on the winning and losing recording parts of the page
- reload/refresh the page, verify that both Wins and Losses are reset to zero

Entry Criteria:

- the testing-criteria provided
- running version of application for testing
