UNSAVED CHANGES

Edit

Description

Reloading the page does not reset the Wins and Losses

Steps to reproduce:

- start the app by running npm start
- go to http://localhost:8000
- · click on the Draw button
- randomly pick one bot card and click the "Add to Duo" button
- randomly pick another bot card and click on the "Add to Duo" button
- click on the "DUEL!" button
- wait till the page show either you wins or lose, and the result is reflecting next to the Wins or Losses as well
- Refresh/Reload page

Expected Result:

• all cards disappear, page back to beginning stage, Wins and Losses should all get reset to zero

Actual Result:

• Wins and Losses remain the same, reset didn't happen.

Environment:

Operating System: MacOS

Browser: Google Chrome
