≣ Description   Edit

This test will verify that reloading page will reset your wins and losses

Steps:

- start the app use the command of npm start
- access the app at http://localhost:8000
- click the Draw button, 5 bot cards will appear
- randomly pick one bot card and click "Add to Duo" button
- randomly pick another bot card and click "Add to Duo" button
- there will be 2 bot cards in the player-duo div.
- click "DUEL!" button
- you will get the result, either the Wins will increment by one if you win or the Losses will increment by one if you lose
- now click the browser reload, it take you to the beginning of the app page and Wins and Losses should both get reset to zero.

Test Post-conditions:

- check the number next to Wins, it should be zero
- check the number next to Losses, it should be zero as well
